Great game, very fast paced and fun, great pixel art, the only problem is no one plays it. :/. Running it on a high end system with HTC vive and I have not made past the menus at the beginning. The two times it almost seemed to connect to a server it just teleported me to a edge of the menu platform and you are then stuck in limbo.

I would wait before buying this title, even in early access.. i just love these kind of games... but especilly one with a story keep up this work. The third romp through Valorim and still a blast. More faithful to the original (Exile 3) than the last time, better mechanics and streamlined interface don't hurt either. Still miss the 6 character party and the ability to do your own alchemy, but it's probably better this way overall.. Cool game, well made. Love the characters and art! Would be nice to have a mobile version as well if possible.

the game bundle only has one song?. This game has darkness and horror unsettlements!

But its too hard to figure out where to go!!!

Its ruthless to some extent!Great Streetwise tactic graphics at the time!

Some strict sense of humor that bolds into furious creepy sound effects!

A drug underworld of a maniac mess!

I wish i wouldve figured it out if it was a brain teasing genius but its for intelligent people that like plain puzzles and a outcast directions where to go and whats next for the agenda!

Some multimillion dollar empire parts!

But i cant seem to get into it!

Sorry but thats my plunging take on this fractured game love the burrito master. Eeeeeeeeh, it's a nice concept, but the way you aim is ludicrous and will be the cause of your death.. **THIS GAME IS ♥♥♥♥♥♥♥♥♥♥T. DO NOT WASTE YOUR TIME. I hate it.** In the description, (when I got it) said the world's best space game. YAY BUY! but it was a lie.. **DONT BUY IT.**

Even if it's like \$2 it's still bad... its fun. Tho the extra levels should be bit cheaper since everyone on the squad has to buy it. Play DEEP SPACE WAIFU instead, more content, funny story, good music. This is the most bare boned strip em up i've played.. i feel like i just experienced a cinematic event bigger than the avengers end game. 10/10. In spite of the fact that some of the other comments in reviews of this game are true regarding how tricky the interface can be sometimes between the VIVE controllers and objects within the game (turning a key or a dial, for example can be a bit challenging and requires a bit of practice and patience) I'm still going to give it a "thumbs up": the story keeps you guessing, the puzzles are just hard enough (although I'll confess I had to refer to a Walkthrough once or twice when I got stumped) to keep you interested and having fun. I'll say this though: without giving anything away, the game's ending is absolutely mind-blowing visually, and worth playing through the game to see!
